# CONTENTS

## What Is Psychology?

Why Study Psychology?

Psychology as a Science

Empirical Nature of Psychology

Interdisciplinary Nature of Psychology

Limitations of Scientific Understanding

History of Psychology

The Emergence of Psychology as a Science

Functionalism and Adaptive Behavior

Psychoanalytic Theory and the Unconscious Mind

Gestalt Psychology and Perception

Behaviorism and the Effect of External Stimuli

Humanistic Psychology and Personal Growth

The Cognitive Revolution: Rediscovering the Mind in Psychology

The Impact of Culture on Psychology

Contemporary Psychology: Exploring the Diversions of Psychology

Biological Psychology: Human Biology and Behavior

Cognitive Psychology: Mental Processes

Developmental Psychology: A Lifetime of Changes

Personality Psychology: Individual Distinction

Social Psychology: How We Interact With Others

Cultural Psychology: Shaping Psychology Through Beliefs

I-O Psychology: Improving the Workplace

Health Psychology: Health and Wellness

Sport and Exercise Psychology: The Mind-Body Connection

Clinical Psychology: Treating Psychological Disorders

Forensic Psychology: Psychology in the Justice System

Careers in Psychology

Academic Positions

Careers in Counseling and Clinical Work

Other Career Options

## Psychological Research

Observational Insight Into Human Behavior

The Power of Scientific Research

The Scientific Method

Diversity in Research

Conducting Research

Ethical Concerns

Recruiting Participants

Approaches to Research

Descriptive Studies

Correlational Studies

Experimental Studies

Developmental Studies

Being a Critical Consumer of Research

Understanding Statistics

Understanding Reliability and Validity

## Biopsychology

Genetics and Human Behavior

Genetic Variation and Inheritance

Environmental Influences on Genetics

Parts of the Nervous System

Central Nervous System

Peripheral Nervous System

Neural Communication

Signal Transmission

Disruptions in Communication

Parts of the Brain

Hemispheres of the Brain

Lobes of the Brain

Regions of the Brain

Neuroplasticity and Recovery from Brain Injury

Brain Imaging Techniques

Computerized Tomography and Positron Emission Tomography

Magnetic Resonance Imaging and Functional MRI

Electroencephalography

The Endocrine System

## Consciousness

What Is Consciousness?

Sleep and Dreaming

Why We Sleep

Circadian Rhythm

Stages of Sleep

Dreaming

Sleep Deprivation

Sleep Disorders

Drug and Alcohol Effects on Consciousness

Effects on Neurotransmitter Systems

Alcohol and Depressants

Stimulants

Opioids

Hallucinogens

Spontaneous and Deliberate Shifts in Consciousness

Mind-Wandering

Meditation

Hypnosis

The Default Mode Network

States of Unconsciousness

The Unconscious Mind

Anesthesia

Coma

## Sensation and Perception

### What Are Sensation and Perception?

How Stimuli Affects Our Senses

How We Interpret the World Around Us

### Visual and Auditory Perception

Physical Characteristics of Waves

Color Perception and Electromagnetic Radiation

Sound Waves: Frequency, Amplitude, and Timbre

### Vision

The Anatomy and Function of Vision

Our Perception of Color

Depth Perception: How We Perceive Three Dimensions

Vision Loss

### Hearing

How We Hear and Process Sound

Our Perception of Pitch

How We Detect the Direction of a Sound

Hearing Loss

### Our Other Senses

Taste

Smell

Touch

Pain

Balance

### Making Sense of Sensory Information

Key Principles of Perception

Concept of Perceptual Set

## Learning

### How Do We Learn?

Innate Versus Learned Behavior

Associative Learning

The Behaviorist Movement

### Classical Conditioning

Learning Through Response to Stimuli

Acquisition and Extinction

Emotional Responses to Stimuli

### Operant Conditioning

Law of Effect

Positive and Negative Reinforcement and Punishment

Rewarding Successive Approximations

Behavior Reinforcement

Latent Learning and Cognitive Aspects of Learning

### Observational Learning

Social Learning Theory

The Observational Process

Prosocial and Antisocial Implications

### Other Factors Affecting Learning

Cognition and Intelligence

Personality and Motivation

Environment and Culture

## Cognition and Intelligence

### How We Organize and Process Information

Organizing Information Through Concepts

Interpreting Information Through Schemas

Emotional Impact on Information Processing

### Core Cognitive Processes

Language Use

Problem-Solving

### Thinking and Reasoning

Critical Thinking

Logical Reasoning

Creative Thinking

### What Is Intelligence?

The Source of Intelligence

Theories in Intelligence

The Role of Culture in Intelligence Theory

### Measuring Intelligence

Methods for Testing Intelligence

Interpreting IQ Scores

Problems and Limitations in Testing

## Memory

### Encoding Information

Automatic Versus Effortful Processing in Encoding

Semantic Encoding

Visual Encoding

Acoustic Encoding

### Storing Information

Sensory Memory

Short-Term Memory

Long-Term Memory

### Retrieving Information

Recall

Recognition

Relearning

### Parts of the Brain Involved with Memory

The Amygdala: Emotion and Memory in the Brain

The Role of the Hippocampus in Memory Processing

Memory Processing in the Prefrontal Cortex and Cerebellum

The Role of Neurotransmitters in Memory Formation

### Problems with Memory

The Impact of Amnesia on Memory

Misinformation and Suggestibility

False Memories

Repressed Memories

Memory Interference

The Seven Sins of Memory

Failures in Memory Encoding

### Ways to Enhance Memory

Strategies for Effective Information Encoding

Boosting Memory Recall

# Lifespan Development

## Theories of Human Development

- Continuity and Discontinuity
- Diversity of Developmental Pathways
- The Interaction of Nature and Nurture

## Lifespan Theories

- Freud's Psychosexual Theory of Development
- Erikson's Psychosocial Development Theory
- Piaget's Cognitive Development Theory
- Beyond Piaget: Postformal Thinking
- Kohlberg's Moral Development Theory
- Vygotsky's Sociocultural Theory of Development

## Stages of Prenatal Development

- Germinal Stage (First 2 Weeks)
- Embryonic Stage (Weeks 3–8)
- Fetal Stage (Weeks 9–40)
- Ensuring a Healthy Start in Life

## Stages of Childhood Development

- Newborn Reflexes and Sensory Development
- Physical Development and Motor Skills
- Early Cognitive Development
- Language Acquisition
- Parenting Styles, Attachment, and Self-Concept

## Stages of Adolescence Development

- Reaching Maturity
- Changes During Puberty
- Identity Formation

## Stages of Adulthood Development

- When Do We Become Adults?
- Physical Changes and Aging
- Aging and Cognition
- Social and Emotional Aspects of Aging
- Preparing for End of Life

# Emotion and Motivation

## Theories of Motivation

- Intrinsic Versus Extrinsic Motivation
- Instinct and Motivation
- Homeostasis and Motivation
- Arousal Theory
- Self-Efficacy and Achievement Motivation
- Fixed Versus Growth Mindset
- Maslow's Hierarchy of Needs and Self-Actualization

## Theories of Emotion

- Emotion Versus Mood
- Response to Stimuli
- Physiological Arousal
- Appraisal Theory
- Expressing Emotions

## Biological Basis of Motivation and Emotion

- Brain Structure
- Neurotransmitters
- Hormones
- Genetics

## Societal and Cultural Influences on Motivation and Emotion

- Cultural Influences on Expressing Emotion
- Societal and Cultural Impact on Motivation
- The Impact of Modern Development

## Regulating Emotions

- Emotional Impact on Health
- Positive Emotions and Well-Being
- Emotional Intelligence
- Cognitive Reappraisal and Expressive Suppression

# Personality

## What Is Personality?

## Psychodynamic Perspective on Personality Development

- Assumptions of the Psychodynamic Perspective
- Freud's Structural Model of Personality
- Defense Mechanisms
- Psychosexual Stages of Development
- Adler's Inferiority Complex
- Erikson's Psychosocial Stages of Development
- Jung's Collective Unconscious and Archetypes
- Horney's Revision of Freud's "Penis Envy"

## Behavioral Perspective on Personality

- Assumptions of the Behavioral Perspective
- Classical and Operant Conditioning
- Social Learning Theory
- Critiques and Limitations of the Behavioral Perspective

## Cognitive Perspective on Personality

- Assumptions of the Cognitive Perspective
- Cognitive Schemas and Scripts
- Self-Efficacy and Locus of Control
- Cognitive-Behavioral Therapy and Personality Change
- Critiques and Limitations of the Cognitive Perspective

## Social Cognitive Perspective on Personality

- Bandura's Reciprocal Determinism
- Observational Learning and Modeling
- Self-Regulation and Self-Reinforcement

## Humanistic Perspective on Personality

- Self-Concept and Unconditional Positive Regard
- The Fully Functioning Person

## Biological Perspectives on Personality

- Genetics and Personality
- Temperament
- Evolutionary Perspective on Personality

## Trait Perspectives on Personality

- Cattell's 16 Personality Factors
- Eysenck's Three-Factor Model
- The Big Five Personality Traits
- Personality Differences Across Cultures

## Personality Assessment

- Self-Report Inventories
- Projective Tests

## Social Psychology

Internal Versus External Factors

Social Cognition

Thinking About Other People

Thinking About the Self

Social Influence

Why Social Influence Happens

Influencing Thoughts and Feelings

Influencing Behaviors

Social Relations

Interpersonal Relationships

Group Relations

Aggression

Prosocial Behavior

## Industrial and Organizational Psychology

What Is Industrial and Organizational Psychology?

Evolution of I/O Psychology

Implementation of I/O Psychology Today

Industrial Psychology

Job Analysis: Matching People to Tasks

Evaluating Competencies and Personality

Conducting Interviews and the Hiring Process

Training and Mentoring in the Workplace

Performance Appraisal: Evaluating and Motivating Employees

Federal Laws and Recent Developments

Organizational Psychology

Job Satisfaction and Job Stress

Achieving Work-Family Balance

Management Styles and Leadership Theories

Teamwork in the Modern Workplace

Organizational Culture

Workforce Diversity

Harassment Policies

Preventing Workplace Violence

Human Factors Psychology

Workplace Interaction

Emerging Technology in the Workplace

## Stress and Health

The Nature of Stress

How We Perceive Stress

The Power of Stress: Unveiling Its Positive Impact

The Negative Impact of Stress

What Causes Stress?

Categorizing Stress

Daily Hassles and Stress Levels

Major Stressors

Traumatic Stressors and Post-Traumatic Stress Disorder

Physical Impact of Stress

Social Readjustment Rating Scale

General Adaptation Syndrome

Weakened Immune System

Cardiovascular Disorders

Asthma

Tension Headaches

Mental Strain From Stress

Changes in Mood and Behavior

Effects on Mental Health

Strain on Relationships

Work Performance and Stress

Reducing the Impact of Stress

Coping Strategies and Resilience

Problem-Focused and Emotion-Focused Approaches

The Impact of Perceived Control on Stress Management

Nurturing Relationships for Health and Well-being

Exercise, Relaxation Response, and Biofeedback

## Psychological Disorders

Defining Psychological Disorders

The Four “D’s”

Diagnosing Disorders

The Roots of Psychological Disorders

Types of Psychological Disorders

Anxiety and Trauma/Stress-Related Disorders

OCD, BDD, and Eating Disorders

Depressive and Bipolar Disorders

Psychotic, Personality, and Dissociative Disorders

Neurodevelopmental Disorders

Comorbidity

Supporting People with Psychological Disorders

Combating Stigma

Debunking Misconceptions

Becoming Aware of Available Resources

# Therapy and Treatment

## Historical Perspectives on Mental Health Treatment

- Early Beliefs and Practices
- The Reform Movement
- Deinstitutionalization and Community Mental Health

## Contemporary Mental Health Care

- Prevalence of Mental Illness
- Utilization of Mental Health Services
- Challenges in Mental Health Care Delivery
- Innovations and Emerging Trends

## Psychotherapy

- Psychoanalysis and Psychodynamic Therapy
- Behavior Therapy
- Cognitive Therapy
- Cognitive-Behavioral Therapy
- Humanistic Therapy
- Assessing the Effectiveness of Psychotherapy

## Biomedical Therapy

- Psychotropic Medications
- Electroconvulsive Therapy (ECT)
- Transcranial Magnetic Stimulation (TMS)
- Combining Psychotherapy and Biomedical Therapy

## Treatment Modalities

- The Intake Process and Treatment Planning
- Individual Therapy
- Group Therapy
- Couples Therapy
- Family Therapy

## The Sociocultural Model and Therapy Utilization

- Understanding the Sociocultural Perspective
- Cultural Competence in Therapy
- Multicultural Counseling and Therapy
- Ethnic Disparities in Mental Health Services
- Strategies for Increasing Access and Engagement
